2 Weeks

Automation Team

Automating Incident handling through multi Agent concept using Google ADK 2.0

5 Months

MasterCraft

Contributed to development of Mastercraft, a TCS internal LLM-based tool to convert mainframe languages (COBOL, Natural,Php) into Java code.

- Designed and tested language model prompts to improve migration accuracy and efficiency of mainframeto-Java code conversion.
- Applied supervised and unsupervised ML algorithms in a hands-on mini-project to achieve defined classification objectives
