PROFESSIONAL SUMMARY

Systems Engineer at TCS with 1.9 years of experience specializing in batch scheduling, Python scripting, and prompt engineering. Proven contributor to large-scale mainframe-to-Java migration initiatives leveraging LLM-based tools, with strong proficiency in IBM Workload Scheduler (IWS), machine learning algorithms, and Generative AI. IEEE-published researcher (2023) with a solid foundation in data-driven problem solving. A fast learner who adapts quickly to new technologies and project environments, with a consistent focus on delivering results and contributing to organizational growth.

TECHNICAL SKILLS

Languages: Python, SQL

AI / ML: Machine Learning Algorithms, Generative AI, LLM, Prompt Engineering

Tools & Platforms: IBM Workload Scheduler (IWS), Gen AI Tools, Mainframe

Cloud: Cloud Computing (NPTEL)

Other: MS Word, MS Excel, Batch Scheduling & Monitoring

WORK EXPERIENCE

Prompt Engineer | **Tata Consultancy Services — Mastercraft Tool** | 2024 – 2025

- Contributed to development of Mastercraft, a TCS internal LLM-based tool to convert mainframe languages (COBOL, Natural,Php) into Java code.
- Designed and tested language model prompts to improve migration accuracy and efficiency of mainframe-to-Java code conversion.
- Applied supervised and unsupervised ML algorithms in a hands-on mini-project to achieve defined classification objectives.

Batch Scheduler | **Tata Consultancy Services — Enbridge Inc.** | 2025 – *Present*

- Scheduled and managed Z/OS, SAP, Cyclic, Event trigger jobs using IBM Workload Scheduler (IWS) for a large-scale migration project at Enbridge Inc.
- Developed and executed Python scripts to validate and compare ESP data against IWS data, ensuring migration accuracy.
- Debugged scheduling issues for both mainframe and non-mainframe jobs, reducing scheduling errors significantly.

ACADEMIC PROJECTS

Integration of Email Alerts into WhatsApp

April 2022 – June 2022

- Developed a solution integrating email notifications into WhatsApp using WhatsApp API and email protocols.
- Unified communication channels enabling users to manage emails directly through WhatsApp, improving cross-platform accessibility.

Intra-College Web Application (Social Platform)

January 2023

- Designed and built a web-based social platform for college students and staff using advanced web technologies.
- Implemented a secure, scalable database to support networking, resource sharing, and career exploration features.

CERTIFICATIONS & TRAINING

- ILP – Artificial Intelligence & Machine Learning | TCS
- ILP – Python FY25 | TCS
- ILP – Programming Language: Regular Python FY25 | TCS
- Python Programming – Udemy (Online Course)
- Cloud Computing – NPTEL
- Gen AI | TCS
- AI and Data Analytics
- SQL & RDBMS

PUBLICATIONS

- Published a research paper at IEEE Conference (2023). [[Intra College Web Application](#)]
- Published IEEE Paper at TCS Tactics club (2026). [AI Assisted framework for operational validation of Mainframe Batch migration from ESP to IWS]

EDUCATION

B.E. – Computer Science Engineering

Sri Sairam Engineering College | CGPA: 8.39 | Year of Passing: 2024

Class XII – Velammal Vidyalaya (CBSE)

Score: 85%

Class X – Velammal Vidyalaya (CBSE)

Score: 83%

LANGUAGES

English | Tamil | Hindi
